

Dear Awards Dealer,

Welcome to our line of award and recognition products. Since 1984 we have been an industry leader in innovative glass award design and fabrication. Our state of the art machinery combined with meticulous hand inspection assures our dealers that they receive "Award Quality" products which we are proud to say are made in the USA. In addition to our extensive manufacturing capabilities we have established exclusive relationships with 24% lead crystal, optical crystal and marble manufacturers around the world. Along with our high quality standards, we are equally committed to customer service, offering unique and contemporary awards at a price that is as appealing as the product itself. We look forward to our relationship with your company and wish you success with our product line.

# MANUFACTURING FACILITY

## CNC Technology

Our manufacturing facility operates the world's most sophisticated machinery using the strictest quality and tolerance controls. Fabrication starts with our two computer controlled water jet cutting systems using digital files for patterns and a combination of high pressure water and abrasive garnet to achieve perfectly consistent blank shapes. Straight-line edging is done on our multiple Italian made Bovone and Bavelloni flat polish and beveling machines, these are the world's best edging machines producing consistently brilliant high polished miters, bevels, flat edges, and polished arises. Non straight-line edging is done on our two computer numerically controlled (CNC) machines. This is the worlds most sophisticated edging technology and capable of duplicating the movements of a human hand but with computer controlled precision.

*Sperrin*  
*Crystal*

*Sperrin* crystal represents the finest in diamond cut engravable crystal. Created by some of Ireland's finest crystal designers.

The *Sperrin* crystal collection is unequalled in beauty and design. Sperrin's deep classic diamond cuts were specifically designed to compliment the engraving without overpowering it with intricate patterns. Our large engraving panels offer the engraver perfectly balanced areas to add logos and personalizations.

*Sperrin* crystal consists of five product groups named after rivers, valleys, and forests within the Irish Sperrin mountain range. Together they represent the ultimate expression in recognition and fine gifts.

Our Sperrin Crystal is made from the finest materials and made by some of the finest artisans in the world. Each piece is hand made, cut and polished and variances in size might occur, which are acceptable within our quality standards.
